

## How to Clean Up a Broken Compact Fluorescent Lightbulb (CFL)

**1** Ventilate the room.

**2** Scoop up powder and glass fragments using stiff paper or cardboard. Seal in a plastic bag.

**3** Use duct tape to pick up any fragments or powder.

**4** Immediately place all materials used to clean up and the plastic bag in an outdoor trash container. Remember to wash your hands.

**5** Discard any clothing or bedding that comes in direct contact with broken glass or powder from inside the bulb. Washing tainted items may cause mercury fragments in clothing to contaminate the machine and/or pollute sewage.

To learn more about CFLs and why you should be careful when cleaning up a broken bulb, visit [www.epa.gov](http://www.epa.gov).

## Wind Power Subscriptions Available

For well over 100 years, the power of the wind has mainly been used to lift water from wells when power lines were unavailable or too expensive to access. Today, modern wind turbines use the wind's energy to generate electricity more efficiently and this energy continues to be considered as a renewable resource.

Renville-Sibley's members have the opportunity to voluntarily purchase 100 kWh blocks of wind-generated renewable electricity on a monthly basis through the PrairieWinds program. Our wholesale suppliers, East River Electric and Basin Electric, own and operate several commercial-scale wind turbines located throughout North and South Dakota.

Members who wish to purchase wind generated energy from these units at an additional cost of \$0.50 per month for each 100 kWh block should complete the sign-up form and return it to our office. If you have questions, please call the Renville-Sibley office for more details.

### NOTICE:

The November through March Renville-Sibley Co-op Power board meetings will begin at 10 a.m. on the fourth Monday of the month.

### NOTICE:

Renville-Sibley's office will be closed on Thursday, Nov. 24, and Friday, Nov. 25, in observance of the Thanksgiving Holiday.

Yes! I want to sign-up for the PrairieWinds renewal energy program. Each block will add an extra \$.50 to my monthly bill.

- One block (100 kWh) – \$.50
- Two blocks (200 kWh) – \$1
- Three blocks (300 kWh) – \$1.50
- Four blocks (400 kWh) – \$2
- Five blocks (500 kWh) – \$2.50
- Other— number of blocks \_\_\_\_\_

I understand participation in the PrairieWinds renewal energy program is voluntary and that I may cancel at any time by contacting Renville-Sibley Co-op Power Association.
